

Stock Management and Client Feedback System

July 13, 2022

INTRODUCTION

Thank you for the opportunity to submit a proposal for Stock Management and Client Feedback System.

Based on our preliminary discussion, I have identified and listed below the Needs and Solutions that we will want to address in this System.

OVERVIEW

We need to create a attractive website using Laravel and SQL Database.

In this system you can easily manage your stock and client feedback.

Userrole and access

We will create the login system for all type of users.

ADMIN

Admin has all rights.

Regarding Users, Stock, Client, Lead, Calling and many more.

Admin can add client or import clients from the CSV file. Also, Admin can change and remove the details from client.

Users

There are different type of users we can add for this system.

Ex. Telecaller, Product Manager, feedback taker etc.

Product Manager

Admin can create user for manage product.

Also admin can give right to user role to access this section.

- Add Product Name
- Add product category
- Add product Qty

Stock Manager

Stock Manager has right(Permission) to manage all the product stock.

He/she can check total production, add new stock., product based qty, sold stock, remaining stock.

Telecaller

Telecaller can call to client and he/she can add the feedback to our system.

He can check todays calling list, Recall list and add remarks

Detail Description

We will create Stock Management and Client Feedback System for your company.

In this System you can add users and user role.
Based on user role he/she get access of his work.

Stock Management

Admin can create user as stock manager.

Admin gives permission for manage products and stocks.

- Product manager add product, category, and qty.
- Product Manager can check how much products quantity is available.
- End of the day he can add the new qty, remove sold qty.
- He/She can check total production and selling of product.

Tele caller Department

Admin add the client list to system.

Telecaller will call to client from given list and

- He/she will add the calling date and time
- He/she will mention conclusion/remark of the call.
- If need to recall same client he/she can add next call date and time and this will auto set in queue.
- He/she can add the tag based on talk. Ex. ReCall, Query, Not Received, Lead to Client etc.

Conclusion

You will get end-to-end system from add lead to convert client And Product production to selling product stock management system.

Please let us know if you have any query or Question.

We are give estimation based on above feature.

We can add new modules in this system in future and cost will be extra basis on the module.

For make this entire system We required estimate time and cost is below.

Time : 30-35 Working Days.

Cost : ₹ 22,000/-

THANK YOU
